

Pulmonary Embolism (PE)

A blood clot that forms in the deep veins of the legs or arms and breaks off and travels to the lungs, it then becomes a Pulmonary Embolism (PE). This is potentially life threatening.

Symptoms:

- Unexplained shortness of breath
- Chest pain (may be worse with deep breaths)
- Light headedness or fainting
- Rapid breath
- Rapid heart rate

If you are experiencing any of these symptoms, please seek medical advice immediately.

A Pulmonary Embolism could be potentially life threatening.
